## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. For example, claim 1 recites “receiving data from high-order STM and STS and low-order TU and VT sources” in line 2. Similar limitations are found in independent claim 11 and 19. STM is a unit of SDH and STS is a unit of SONET. Similarly, TU are used with SDH and VT are used with SONET. It is unclear whether the claimed invention receives both SDH and SONET frames. Furthermore, the examiner could not find the support for such limitation in the specification.

### ***Response to Arguments***

3. Applicant's arguments with respect to claim 1-21 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CLEMENCE HAN whose telephone number is (571)272-3158. The examiner can normally be reached on Monday-Friday 9 - 5.
